About This Game

Sword Mans is a physics based sword fighting brawler where you control the sword instead of the swordsman. There is a man holding on to the sword who will flop behind it as it moves. Your goal is to defeat the other players by hitting the man holding onto their sword while defending the man holding on to your sword. This game supports both controllers and mouse and keyboard input.

Versus:

- Fight against your friends or the AI in local multiplayer versus mode. Use stage hazards and power-ups scattered across some of the many stages to get the upper hand in a fight.

Co-op:

Play solo or team up with your friends in one of two cooperative game modes.

- Arena: Fight endless waves of enemies and earn gold which can be used to buy cosmetics.
- Campaign: Play through the campaign chapter by chapter. Chapters will be released periodically and the story will continue with each chapter.

Customize your sword man with a host of different weapons and cosmetics that can be unlocked through game-play. Damage is

physics based, meaning heavier weapons will hit harder, but aren't as agile.

Sword Mans features a completely original soundtrack designed to fit the varying stages.

Content will be continually added in periodic updates including new stages, new cosmetics, and new chapters to the campaign.

LUXOR: Mah Jong is Mahjong so you know right off the bat what to expect. If you don't like Mahjong, you won't like this game either, but for fans of the game LUXOR: Mah Jong offers stylish graphics, several modes of play, period specific egyptian music and a wide variety of power-ups that tweak the traditional game just enough to keep things interesting. The game also supports the Steam Overlay although true widescreen is not available. In most respects, LUXOR: Mah Jong is a polished puzzle game and deserves to be in the library of any serious Mahjong player. I highly recommend this game to fans of the genre, or even casual newcomers who enjoy a well done casual game.. i think you need to fix it when loading it on the cv1 i stay on the steam vr menu while the game is loaded in the background instead help. No tutorial. No story. Not related to anime as it was presented. Font and UI are not scalable. Poor character animation. Poor sound effects. For the first time I experienced MMO world that does not care for its new players.. It was a tad buggy. But it was fun as hell. I love to support new developers so it was well worth the \$5.

Some annoyances and unclear strategies were had, not sure if we won because we gamed the system or not but hey, that is what fun is.

I would love to see more levels or expansion options and polishing up and this game will be a solid.. the game is very poetic and difficult, but I advise those who are not afraid of these difficulties!. This game seems a beta version to be tested, because has too simple bugs. The walls, main doors and towers not fit when try to rebuild over his places; you can't stop the troops training; the cursor and his info disappear near the buildings, many times crash to desktop...

Not only did I enjoy the characters of this volume but also the information we learned. With Elwurd it was more about the character and someone else while for Kup and Fol it was about gold bloods and psionics in particular. Elwurd is basically bae and the gold gremlins are a blast!. If you already own this game then this is everything you could want more for this game, it adds a complete new chapter to the level list of ESJ and perhaps we get to know where your butt REALLY is.. Wasn't this map once free?. The recent update including the strategy mode cuts down on the "clickiness" by a lot; which leaves this game as a 4V5 for somehow being fun and educational. The update also had the unseen benefit of cutting down graphical issues, since it can go as a turn-based, not real-time.. superb gem of game! it has all the feel of a 90s era game like Star Control or Star Flight, Starships Unlimited or countless other space exploration/strategy games of then. there is a lot going on in this game, the 2d minigames are many and varied, from blowing up asteroids for rare power crystals, to boarding a distressed ship and taking out the alien invader while trying to repair the ship and extinguish fires, to firing research probes through anomalies and wormholes, and also visiting planets to collect materials and other surprises . the gui has a lot on it but it is all explained and one gets the hang of it pretty quickly.

i prob like this more than other similar games like endless sky or unending galaxy, because in this game you have a lot of freedom to go at your own pace, time moves only when you do.

i like the varying types of stations you can go to - general space stations, spaceship factories, trade centers as well as merchant ships. the game has a lot of random events - good and bad ones, however nothing so random or ridiculous so as to ruin the game ever.

this one i will be playing for a while!. The worst. Chuck doesn't approve.. Don't buy, unfinished and won't be finished
